SEASON 1901-1902

FORESTVILLE, CAL.

Salesyard, One-Fourth Mile Northwest of Postoffice, on Road to the Railroad Station
TO CUSTOMERS

All orders for trees and plants for shipment, amounting to $5.00 or over are carefully packed and delivered to the transportation companies in good condition, free of charge, after which we will not be responsible for any damage that may result from delay or accident while in transit.

For orders amounting to less than $5.00, a small charge will be made to cover cost of materials and ...or of packing.

To secure a good selection of varieties orders should be sent in early.

Customers are requested to notify us immediately of any mistakes made in filling orders, that they may be promptly rectified.

Orders to be sent by express C. O. D. must be accompanied by one-half the amount in cash.

When trees ordered cannot be furnished, we do not substitute other kinds, unless expressly requested to do so. Parties unacquainted with the different varieties of fruit will do well to leave the selection to us, as we will send only such varieties as give general satisfaction.

Our trees are grown on light upland soil, without irrigation, and are exceptionally well rooted; as plenty of good roots are the most important part of a healthy tree, this point should not be overlooked.

Our trees are graded by caliper, where caliper and height are both given height is approximate and does not govern The most careful attention is paid to grading. We make two grades this season, the largest, XX grade, being one-half inch in diameter and up, and first class in every respect. The next size, X grade, is three-eighths of one-inch in diameter, and first class in every respect. There are some that are too small, or defective in some ways for these grades, but healthy, which we sometimes sell, but do not quote in list. Parties wishing any of these should send for special description and price.

An experimental orchard is conducted, where all new varieties are tested, and from which buds and scions are obtained. While not boasting of as large a stock, or as extensive a list of varieties as some nurseries, we are enabled to pay more personal attention to the production of our stock, and thus reduce the chances of mistakes.

All orders from unknown correspondents should be accompanied by a remittance.

When less than 5 of a variety are taken retail prices will be charged.

Remittance may be made by Postal Order, Bank Draft on Santa Rosa, or San Francisco, or by express. Money sent by registered letter must be sent at sender's risk.

As soon as trees are received from the Nursery, they should be care-

fully “heeled in” until planted. New orchards will do much better, if the ground is thoroughly plowed to a depth of twelve to sixteen inches before planting.

In planting do not bend the roots, but dig the hole large enough to re-

ceive them freely. No matter how carefully trees are dug, some of the

roots are occasionally bruised or broken. These roots should be trimmed
back. It is also best to shorten some of the longest roots, making a clean cut from the under side. Fill the hole with surface soil first and pack it firmly around the roots. Trees should not be planted deeper than they stood in the nursery.

The tops should be cut back in proportion to the roots, and on trees that are branched, the side limbs should be cut back to within two or three buds of the tree, leaving the terminal buds on the top of the limbs. Where there are too many side branches a part of them should be removed entirely.

Positively no business transacted on Sunday.
Prices subject to change without notice.

GUARANTEE

All trees raised in these nurseries are guaranteed true to name, as far as any reliable nurseryman can do, and we give our personal attention, and exercise the utmost care and diligence to prevent mistakes, but should any mistakes occur, we agree upon proper proof being made, to replace any trees that may not prove true to label free of charge, or to refund to purchaser of such trees the original cost of the same. It is mutually understood and agreed between the purchaser and ourselves that we are not to be held liable for any greater sum. We solicit your patronage, but cannot in justice to ourselves accept orders on any other terms.

RULE—Square Method—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which divided into the number of feet in an acre (43,560), will give the number of plants or trees to the acre.

RULE—Equilateral Triangle Method—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.
APPLE TREES

One and Two Year Old XX Grade ½ in. and up.. $1.25 per 10; $10.00 per 100
One Year Old X Grade % to ½ in ............ $1.00 per 10; $8.00 per 100

CLYMAN PIPPIN

CLYMAN PIPPIN—Originated from seed brought from the east in the early '50's and planted in Green Valley by James Clyman, the originator of the Clyman plum. There are trees of this apple scattered through Green Valley. The trees are very thrifty growers and enormously productive, one-half to a ton per tree being a common crop. The apple resembles Yellow Newton Pippin in appearance, but is larger, and comparatively free from scab, of rich flavor, inclined to cling tenaciously to the tree, wormy apples occasionally hang on till they rot; this is the only objection growers have to this apple; keeps till midwinter.

Apple Trees

One and Two Year Old XX Grade ½ in. and up.. $1.50 per 10; $12.50 per 100
One Year Old X Grade % to ½ in.. 15¢ each; $1.25 per 10; $10.00 per 100
GRAVENSTEIN MORRIS RED
BISMARK

MORRIS RED APPLE—Originated with Reuben Morris of Oakland, Iowa, supposed to be seedling of Jonathan, tree resembles Jonathan in appearance, is slender and vigorous in growth. Tree does not get as large as Baldwin, Gravenstein, or some of the thriftiest growers, but bears every year. The oldest tree in this vicinity having bore seven years in succession. The apple is medium to large, bright red, and of fine, crisp flavor, ripening the last of August and early in September, about three weeks later than Gravenstein; We consider this the best quality apple, ripening at this time of year. This apple is not a late keeper.

One Year bench grafted trees on whole seedling roots, % to ½ inches in diameter at collar, 20 in to 4 feet high, price same as X Grade.
PLUM TREES

One Year XX Grade ½ in. and up...15c each; $1.50 per 10; $15.00 per 100
One Year X Grade % to ½ in. 15c each; $1.25 per 10; $10.00 per 100

WASHINGTON
JEFFERSON
SHIRO
CLIMAX
WICKSON

CLIMAX PLUM—Originated by Luther Burbank, fruit heart shaped, bright red, yellow flesh, large size, very juicy, delicious flavor, ripens early in July, cracks some; especially on wet land, the cracked plums make an attractive dried plum but do not dry very heavy. We consider this the finest flavored plum we have ever tasted and no family orchard is complete without it.

SHIRO PLUM—Originated by Luther Burbank. Heavy bearer, medium size, color light yellow, yellow flesh, clingstone, long keeper, ripens earlier than Burbank. Price 15c each.

SULTAN PLUM—Originated by Luther Burbank. Skin dark red, flesh red, meat very firm, flavor excellent, pit small, dries heavy, ripens about one week earlier than Burbank, is a fine keeper and shipper; does not crack. It makes the finest sauce and jelly of any plum we have ever tasted, wherever plums are used for cooking purposes it is bound to be a winner. We believe this plum will prove to be the most valuable commercial fruit Mr. Burbank has ever introduced.

Price, small trees on peach root 25c each, dormant buds on peach and myrobolan, 15c each.

PRUNE TREES

On Peach Root and Mariana

One Year XX Grade ½ to ¾ in. and up 15c each; $1.50 per 10; $15.00 per 100
One Year X Grade % to ½ in. 15c each; $1.25 per 10; $10.00 per 100

One Year X Grade % to ½ in. 15c each; $1.25 per 10; $12.50 per 100

PETITE

CLAIRAC or Imperial Epineuse

SUGAR PRUNE—A seedling of Petite prune; originated by Luther Burbank. Ripens earlier that Petite, flesh yellow, skin, dark purple, easy to cure, seems to be inclined to be a heavier bearer than the French, rate of shrinkage 3 to 1, average size 40 to 1b, flavor nearly as good as Petite, usually does not make a good union on peach.

Price XX Grade, on Myrobolan root.................25c each; $2.00 per 10.
Price X Grade on Myrobolan root..................20c each; $1.50 per 10.
PEACH TREES
Owing to damage by late frosts, peach trees are scarce this year, those that were not killed outright were cut back and are short and stocky, and exceptionally well rooted.

One Year Old XX Grade ½ in and up $1.50 per 10; $15.00 per 100

CHESTNUTS

MARRON QUERCY chestnuts, grafted, much superior to the common seedling chestnuts which, like a seedling apple, may be good, but quite probably will not, and seldom bear until 10 to 15 years of age. The Marron Quercy begins bearing when 4 or 5 years old and bears increasing crops every year. While on seedling chestnuts only a small per cent of Burrs have nuts, with this variety nearly all the burrs have one or two fine large nuts.

MARRON COMBALE chestnuts, grafted, similar to above but larger, the largest chestnuts we have seen, trees make a more upright growth and do not bear so young as Quercy. Mr. Felix Gillett of Nevada City, who introduced both of these varieties from France over thirty years ago has a tree of Combaile which began bearing in 1876 and has bore a crop each succeeding year, making twenty-seven successive crops; the tree now bears 100 to 150 lbs per year. The quality of each of these varieties is unexcelled. 

WALNUTS

Cal. Softshell—The nuts from which these trees are grown were as fine as any I ever planted, equal if not superior to the Santa Rosa improved.

Two Year, 2 to 3 feet high ............... 15c each
Santa Rosa Improved Softshell, Maddocks strain, 1 year, 6 to 12 inches high ...... 10c each

FILBERTS

Kentish Cob 1½ to 3 feet .................. 15c each

ORANGES AND LEMONS

Two Year buds ½ to ¾ in. 75c each; $7.00 per 10; 100 rates on application.

BLACKBERRIES

Lawton .................................. 5c each; 25c per 10; $1.00 per 100
Himalaya Giant Blackberry—Vines trail on ground or on trellis similar to Loganberry, make a growth of 15 or 20 feet in a season, berry medius size, late, very productive, very tart acid flavor until thoroughly ripe when they have a very pleasant taste.

Price rooted tips .................................. 10c each

Mammoth Blackberry—Originated by Judge Logan of Santa Cruz, who is the originator of the famous Logan berry, first introduced by Judge Waters of the Pajaro Nursery, described as being the largest and finest
blackberry ever known, plants are strong growers, run on the ground the same as Logan berry vines, enormously productive, fruit of the largest size, from 2 to 2½ inches long, very sweet, grows in clusters the same as other blackberries, superior to other kinds in appearance and flavor, fine for cooking or eating fresh.

Price rooted tips............................. .10c each
